

ABOUT US

John Kosar, CMT, Asbury Research’s Chief Market Strategist since its inception in 2005, has more than 30 years of experience and insight in analyzing and forecasting global financial markets. John spent the first half of his career on the trading floor of the Chicago futures exchanges, where he had the opportunity to learn how the US financial markets work from the inside out.

This experience, early in his career, became the foundation for his unique analysis, insight, and perspective. He is frequently quoted in the financial press in both the US and abroad including The Wall Street Journal, Barron’s, Yahoo! Finance, and Reuters, can regularly be seen on U.S. financial television including CNBC, Fox Business, and Bloomberg, and speaks regularly across the US at various events including Market Technicians Association conferences and Chartered Financial Analyst (CFA) luncheons. John has been consistently recognized as a top U.S. financial market analyst throughout his career, and was awarded the Chartered Market Technician (CMT) designation in 1999. John served as Vice President of the Market Technicians Association (MTA) from 2004 to 2006, and was a member of its Board of Directors from 2002-2006. During his career he has been an analyst and trader for Shearson American Express, NatWest Markets, Greenwich Capital Markets, and Deutsche Bank. Prior to founding Asbury Research in 2005, John was Senior Research Analyst for Bianco Research in Chicago.

Asbury Research believes that the market itself is the ultimate clearinghouse for the collective wisdom of all its participants, people and businesses that have real money at stake, and as such is the most comprehensive, objective, meaningful, and sensitive evaluator of all known and unknown market factors that can affect your portfolio. We analyze what the market “thinks” via a large and unique blend of quantitative, technical, and behavioral metrics and proprietary models that tend to be more intuitive and forward-looking than the typical Wall Street approach — which help us to keep our clients one step ahead of the market.

Our clients are a diverse group of professional investors including hedge funds, long only portfolio managers, sector fund managers, financial advisors, market strategists, commodity fund managers and corporate investment committees. This is what they say about us:

*“Your research along with your total (as Steve Jobs use to refer) ecosystem on how you present it and deliver is **the best I have seen in my 27 almost 28 years in the business.**”*

Chief Investment Officer, Hedge Fund, Minneapolis

*“I have not seen better technical analysis in my 19-year career. John (Kosar, Director Of Research) is objective, clear, experienced, sensible, and accountable. He remains disciplined when markets are schizophrenic and does not hesitate to present contrarian calls even when plenty of seasoned participants are pointing the other way. Accurate macro forecasting is the product of sound fundamental analysis and superior technical analysis, so **John’s work is invaluable to me.**”*

Macroeconomic Strategist, Investment Research Firm, New York
